THE FABRICATION EXPERTS

Since 1977 Interior Craft has strived to provide the leading metal fabrication services in India

We make a sustained investment in machines and tools to ensure & maintain one of the most innovative and efficient services in the industry. As one of the country's leading metal fabricators, we not only provide metal fabrication products, but also aide in detailing and alter-materials to achieve the desired design in the most efficient manner. We are not just another metal fabrication vendor, we are a complete service provider for every metal related item for your esteemed project whether it be a residential or commercial project, we have you covered.

With more than 40 years of expertise and knowledge behind us, we have built up an impressive India-wide customer base in a variety of marketplaces and continue to innovate, design & develop products like aluminium C channels with variable widths, railings, gates, cantilever structures etc. which are class leading and easy to execute on the toughest of the site conditions with our motto **"YES, IT WILL BE DONE WITH THE FINEST OF DETAILING & QUALITY".**

Office Block

GATES

Interior Craft is pioneer in designing & developing new gate designs along with custom made main gate locking systems, pivot systems, sliding channels & stainless-steel wheels, all of which is made in house. Gates are designed keeping in mind the design language of the architecture, safety, aesthetics, practicality, ergonomics, and its usability and the materials vary from wood to mild steel to stainless-steel to aluminium, copper & bronze and the design can vary from modern to classical, to gothic & Victorian. Every gate is developed with a provision of automation which can be added on demand & as per requirement of the client. All hardware made for our gates are strictly made from only 304 grade stainless-steel. We manufacture gates using in-house designed and developed aluminium profiles that make our gates lighter & elongates its life span.

Staircases & Railings

A luxury staircase can become the ultimate design feature in an attractive home or commercial space, with high-end stairs acting as an art piece. Interior Craft has a proven track record in producing luxury staircases for elegant homes and commercial spaces. At Interior Craft, our unique design process allows for complete customization of your stairs and railings to compliment your residential or commercial space. The variety offered at Interior craft includes glass railings with bottom channels, custom made metal bands, classic cast aluminium design balusters, and many more. We build mono-stringer, double-stringer, cantilever, and spiral staircases to your specifications& design language. In addition, you can customize the various material finishes including powder coated aluminium sheets, open pore veneers, solid wood, PVD coated stainless steel and many other finishes & metals to fit your unique project.

Canopies & other cantilever structures

Agrand cantilevered canopy makes an entrance an experience on its own be it your home's drop off area, or your office's entrance porch. Interior Craft effectively utilizes the main entrance of the building by designing and installing visually appealing entrance canopies to enhance the overall look of the building and improving the functionality. To make these cantilever and column less structures we use corrosion resistant materials like aluminum, stainless-steel, galvanized mild steel which can be cladded with multiple colour and textured materials for visual enhancement.

Pergola

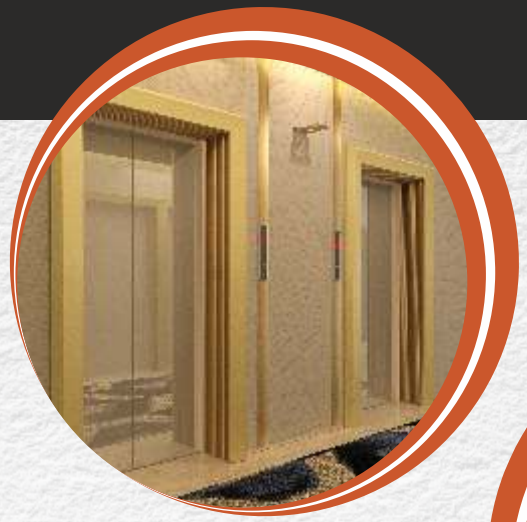
Whether it's for shade or for looks, a pergola is a beautiful addition to any landscape. A pergola makes the outdoor lounge space feel more intimate and comfortable and also adds warmth to the decor. At Interior Craft we design & manufacture pergolas using custom made aluminium sections, SS internal bush systems with various finishes to match the landscape decor.

Skylights

Natural light is of utmost importance in today's metropolitan environment and with a luxury skylight, your interior spaces will never run out of the zen & positivity that the sunlight carries. Interior Craft offers skylights with various laminated glass & double-glazed unit options on metal structures which can with stand not only the load of people but also can be used as a structure to hang luxury chandeliers. We design & build skylights, keeping in mind the multiple aspects & its usability therefore, our flat design skylights also can be used as glass floor.

Lift Jambs

At Interior Craft we design and curate lift jamb designs using custom design led aluminium profiles, stainless steel, leather wood etc for various finishes. It enhances the look of your elevators and also helps to avoid the hassle of installing & maintaining stone. It adds a touch of detailing & aesthetic value & makes the installation process a cake walk.



Manhole covers

MetaVeil Manhole Covers are air-tight and water-tight covers with an easy to install system and seamless design that blends in with the floor pattern disguising itself. Our manhole covers are very lightweight, featuring a highly aesthetic extruded construction. In Addition to the high quality, it is also more efficient than stainless steel covers.
The cover comes with allen key system which not only makes it easier to open the bolts but also acts as a handle by screwing into the same space and stilts up the cover for easy manhole access. All our manhole covers are clear anodize coated for extremely good durability and unlike traditional manhole covers, does not rust, or get jammed due to the special throw-out rubber system.
MetaVeil Manhole covers are the perfect choice for areas where an aesthetically pleasing inspection cover is required. The recessed top allows tiles or stone to be installed blending in with the floor pattern.

Cladding

Interior Craft offers versatile, cost effective, and high-quality aluminium profile & stainless-steel claddings for aesthetic interior and exterior spaces. Aluminium claddings replace age old wood panelling & the hassle of wood warp repairs, polish & termite issues. This panelling system is both used as internal wall panels as well as exterior wall cladding. It is available in different finishes suited to different aesthetic requirements. Our wall cladding panels can be used for various projects like office,corporate, retail,and residentialinteriors, and exteriors. These claddings can be put in a single piece up to 6 meters in heightand indefinitely in width without a single visible joint. This innovative cladding system can be used to clad curved surfaces like columns or curved partitions. It is a maintenance free and durable panelling system which can be assembled very quickly in a non-messy way.
